Wrapped In Comfort

My Story

I have been living with chronic pain for 20 years, a journey that began during my first two years at university and intensified in the fall of 2000. Daily headaches and neck pain made it difficult for me to maintain a consistent work routine, especially in my physically demanding role in wine industry. The 2000 harvest was particularly challenging, and it wasn't until four years later that I received an official diagnosis of Arnold Chiari Malformation, a condition where a small skull compresses the brain's tonsils and restricts spinal fluid flow. Fortunately, after undergoing surgery in 2005 to create more space at the back of my skull, I experienced a decade of minimal pain, allowing me to marry and raise two beautiful children. However, as I've aged, my pain has returned, prompting me to explore all possible health solutions. Realizing that I couldn't find what I needed for my specific pain, I began creating my own targeted pads for areas like the legs, neck, and head. Now, I am excited to share my products with others to help them manage their pain as I have.
